REBUKE BY SARCASM.

About the Poorest Place to Use It Is in
 the Classroom.

In a well known Boston school there
 was a boy conspicuously dull at his
 Latin. He was a straightforward fel-
 low and a gentleman by birth and
 breeding, but he was a bungler at syn-
 tax.

One morning he had tangled himself
 in a simple phrase. The teacher asked
 a question that should have cleared
 him. But the poor lad did not know
 the answer.

Then the teacher leaned back in his
 chair, rolled his gray eyes to the cel-
 ling and said for all the class to hear,
 "I have been told that it is a hard
 thing to stuff a wildcat with butter,
 particularly if you have to do it with
 a hot axel, but that is child's play
 compared with putting Latin in a boy
 like this."

Of course the laugh came, but as the
 boys laughed they despised the teacher.

"Sarcasm," said Carlyle, "is the lan-
 guage of the devil." Be that as it
 may, it has turned many a schoolroom
 into a place of torment.

A boy may be too dull to be in a fool,
 but while allowed to be there he can
 never be dull enough to justify a knife
 thrust from one whose first duty is to
 help and cheer him. Boston Herald.

OYSTERS AND DYSPEPTICS.

When the Bivalves May and When
 They Should Not Be Eaten.

It is popularly supposed that the
 oyster digests himself in the human
 stomach owing to the great size of the
 liver, which is crushed as mastication
 begins and is thought to digest the
 mollusk itself. As the oyster, more-
 over, contains some 10 per cent of ex-
 tremely assimilable protein, together
 with phosphorized fats and glycogen,
 it has always been freely administered
 to convalescents, while dyspeptic boys
 vivants have never hesitated to eat it
 abundantly.

Dr. Pron expresses the opinion that
 the oyster may be allowed, therefore,
 to those dyspeptics whose gastric func-
 tions are deficient. In anorexia, gastric
 atony, ulcer and incontinent cancer, and
 to convalescents from acute disease, as
 it is likely to improve the appetite and
 to excite the stomach to increased
 motor and chemical activity.

But to the large number of dyspep-
 tics whose stomachs are hyperacid or
 hypersensitive Dr. Pron would forbid
 the oyster as well as all other stimu-
 lating foods. In many of these dys-
 peptics the gastric secretion is already
 sufficient, and it is unnecessary and
 unwise to increase it. — New York

TRAVELING LIBRARIES.

Grange Scheme That Has Worked Out
 Successfully in Ohio.

The grange traveling library is a fea-
 ture of education work in some states
 that is proving very valuable. Our at-
 tention was recently directed to such
 a library scheme in a county in Ohio
 where the various granges of the coun-
 ty have formed a library association,
 the officers of which are a superintend-
 ent of librarians and the librarian of
 each grange that owns a library. The
 libraries cost \$12 each, and each grange
 in the association has one library in
 its possession all the time. Each grange
 has control of its own library, can buy
 or sell books, provided the value of the
 library is not allowed to fall below \$12.
 It is the duty of the librarian to keep
 a record of the books, the cost of each
 volume and the number of times each
 book has been drawn from the library.
 On these various matters he reports to
 the superintendent of librarians every
 three months. It is the duty of the
 latter officer to present the subject of
 libraries to each grange in the county,
 asking those not members of the li-
 brary association if they will purchase
 a library and become members, or, in
 case they are already in the associa-
 tion, if they will add new books to
 their library. Care is taken that there
 be no duplicates among the books.
 This seems to be a very feasible work-
 ing plan for a grange to have the ben-
 efit of the reading of a large number of
 books during the year at a very slight
 expense, and it is to be commended to
 granges everywhere.

Moving Pictures For Farmers.

Until suitable moving pictures can
 be developed the stereopticon will fur-
 nish a very interesting entertainment
 for an hour in the grange. Such an
 evening is reported in an Ohio grange,
 when the following, among other,
 slides were shown:

Longfellow's "Village Blacksmith"
 (six slides); "The Bridge" (four slides);
 "The Battle Hymn of the Republic,"
 sung by the grange from the slides;
 "The Independence Ball" (six slides);
 views of Chicago's stockyards.

In all about fifty pictures were
 shown, which made a decided change
 from any program the grange had ever
 had presented. We pass the idea
 (which is by no means a new one)
 along with the suggestion that those
 granges that have never had such a
 program try it.

The Grange Fair.

The distinctively grange fair is com-
 ing to be a fixed institution in many
 states. The exhibits are confined to
 grangers, and small premiums are
 awarded. Indeed, in some sections the
 grange fair is really more of an agri-
 cultural show than is the regular
 county fair. It is, of course, of nar-
 rower limitations, but it affords a
 means of pleasant rivalry among
 grange members and incidentally is a
 means of advancing the agricultural
 interests of the community. Where
 there is a good grange agricultural
 show, there is sure to be a live grange.
 The best grangers are those that are
 doing most for the community in which
 they are located.

Improving It.

A foreigner meeting an American
 friend said to him, "How are you?"
 The latter replied, "Out of sight."
 The man considered this very clever
 and decided to use the expression on
 the next occasion. Shortly after he
 was met by a friend, who asked, "How
 are you?" With visible pride he an-
 swered, "You don't see me."—New
